

OKLAHOMA CITY CONVENTION CENTER

Oklahoma City, OK USA

OVERVIEW

The stunning new Oklahoma City Convention Center is a \$288 million public funded project that opened January 2021. The design was heavily influenced by the building's relationship to its surrounding environment. Level 1 relates to the warm earth, Level 2 connects to the horizon line, and Level 3 takes cues from the colorful Oklahoma Sky. Strategic use of color and materiality supported this concept throughout the interior design. The glass atriums capture the natural light pouring in across the downtown skyline.
